National Slimline Pickup
Information & Wiring Diagram

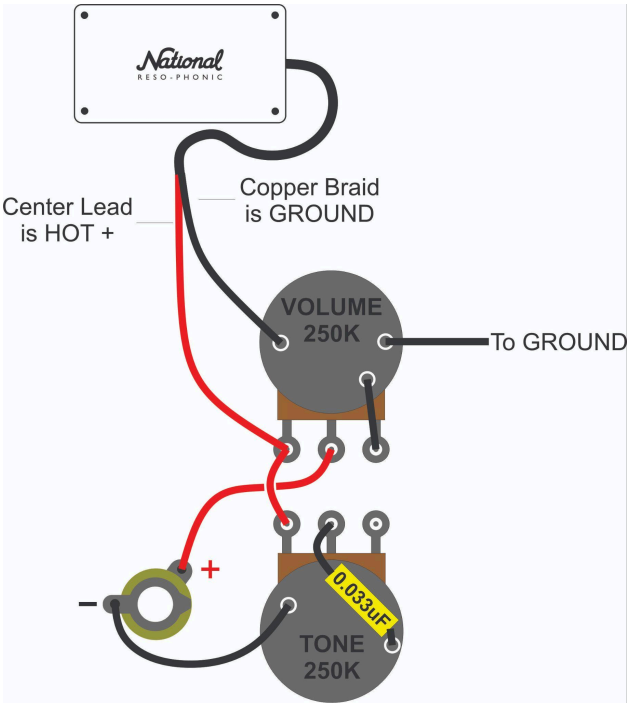

The National Slimline pickup built by Krivo®Pick-Ups is is a dual-coil humbucking thinline pickup designed to be affixed to the top of a National Guitar at the end of the fretboard. The Slimline incorporates all of the best qualities of an extremely warm sounding humbucker, while still being microphonic enough to amplify the nuances of the actual resonator vibrations.

An output jack and 3M® double-stick tape are included. Can be wired directly to the output jack or with volume and tone knobs.
